

**Fittings and Ex-Floodlights  
Lamps for Ex-Pendant Light Fittings and Ex-Floodlights****Lamps for Use in Ex-Pendant Light Fittings and Floodlights**

Lamps for Ex-Pendant Light Fittings and Floodlights are normally not part of the delivery. The lamps are specified by IEC Standards and described by different Lamp Designation Systems. In Europe a standardized system was developed and introduced by the German ZVEI. This system (LBS) allows easily to name a lamp independent from the different manufacturers.

In the following table all lamps used in the Ex-pendant light fittings and floodlight are shown with the relevant short description and LBS-name.

**Spare Parts**

As well as the above, there is also a large amount of spare parts available for maintenance and repair work. If required, please contact us, you will find that we will be more than pleased to help you.

We must point your attention to the fact that repair work done on explosive-protected products must be carried out with original spare parts only! If this is not the case and third-party parts are used, the Certification and Approval for the product will be forfeited and a possible reduction of the explosion-protection may be achieved.

**Repair Service**

Of course Cooper Crouse-Hinds GmbH upholds its own Repair Department where customer repairs are carried out. Our qualified and schooled personnel carry out repairs and overhauling using original spare parts, quickly and efficiently. This service also includes the end quality testing needed for explosion protected products.

With this service you have an "assured safety" as do all overhauled Ex-Lamps and products by Cooper Crouse-Hinds GmbH.
